

THE GOLFWORKS®

INSTRUCTIONS FOR: The Grip Tray Adaptor Code: SWRMGT

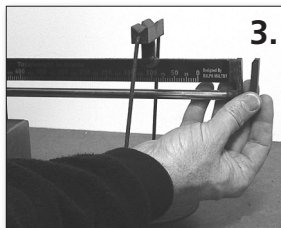

1.

The Grip Tray Adapter (SWRMGT) for the Ralph Maltby Golf Club Scale was developed to allow the club maker to check the swingweight of a golf club before the grip is installed. The Adapter easily clips on the end of the scale balancing arm (see photo 1 and 2).

2.

3.

A counter balancing magnet is included to recalibrate the scale after the clip is installed. The magnet is placed on the end of the balancing arm (see photo 3).

4.

The scale will balance to 0 after the clip and the magnet are installed (see photo 4). The Grip Tray Adapter allows the grip to be placed at the butt end of the scale before installation, simulating a complete club swingweight.

SPECIAL NOTE: Be sure to remove the magnet if you remove the clip. This is necessary for the scale to stay calibrated.
