CANADIAN CLUBMAKER REPAIR SERVICES

SHAFT TIP PREPPING We eliminate hours from your clubmaking time by preparing your shafts for immediate assembly. We tip trim unitized shafts to manufacturer's recommendations. For steel shafts, we abrade the tips. For graphite shafts, we remove the polyurethane coating. When you receive your shaft, all you need to do is mix epoxy, install and align it.

TO ORDER: Specify the shaft, the club the shaft will be installed in (i.e. 3-iron, 5-wood), the clubhead (Brand and Model), and whether the bore is standard or a blind bore. **SPREP \$4.95**

REGRIPPING: We regrip your clubs with the grip of your choice. Add **\$3.50** per club for any grip in this catalog.

RESHAFTING: Simply select a shaft, noting the flex and desired length. Select the grip you would like us to install. We will remove your existing shafts, and install the new shaft and grip.

TO ORDER: Add **\$20.00** to the shaft and grip cost you select"

LOFT & LIE ADJUSTMENTS: We bend your irons to the loft and lie specifications you provide. We can also bend any of our irons to your custom specifications.

Note: limitations apply to the bending of some head models, and some heads cannot be bent. Please call 1-800-387-5331 for more information. **LLA \$4.50 per club**
